Kowloon Tong, Kowloon, Hong Kong

Objective

My current research focuses on LLM agents and human-agent interaction, with broader interests in building reliable AI systems for dynamic and open-world environments.

Education

- **Hong Kong Baptist University** — *Sep. 2026 - Present*
  Ph.D. in Computer Science — Hong Kong
- **Shenzhen University** — *Sep. 2023 - June 2026*
  M.Sc. in Computer Science and Technology — Shenzhen, China
- **Shenzhen University** — *Sep. 2019 - June 2023*
  *B.Eng. in Software Engineering (**Honours degree**)* — Shenzhen, China

Publications

C=Conference, J=Journal, S=In Submission

[J.1] C. Gao, **L. Pan**, Y. Nian, L. Li, J. Zhou, W. Ding. **Momentum evidential teacher with dual similarity contrastive learning for open-world noisy data**. Accepted by *TNNLS*.

[C.1] **L. Pan**, C. Gao, J. Zhou, J. Wang. **Learning with open-world noisy data via class-independent margin in dual representation space**. Accepted by *AAAI 2025*.

[J.2] **L. Pan**, C. Gao, J. Zhou, G. Chen, X. Yue. **Three-way decision-based Takagi-Sugeno-Kang fuzzy classifier for partially labeled data**. *Applied Soft Computing* (JCR Q1, IF=7.2), 2024.

[J.3] **L. Pan**, C. Gao, J. Zhou. **Three-way decision-based tri-training with entropy minimization**. *Information Sciences* (JCR Q1, IF=8.2), 2022.

[C.2] X. Liu, L. Wang, **L. Pan**, C. Gao. **Kernelized fuzzy rough sets-based three-way feature selection**. In *International Joint Conference on Rough Sets (IJCRS)*, 2022.

Experience

- **Hong Kong Baptist University** — *Aug. 2025 - Aug. 2026*
  Research Assistant — Hong Kong
  - Conducted research on LLM agents under the supervision of Prof. Kaiyang Zhou.
- **Shenzhen University** — *Feb. 2022 - Jan. 2025*
  Teaching Assistant — Shenzhen, China
  - Artificial Intelligence Overview: Spring 2022, Spring 2023, Spring 2024.
  - Introduction to Artificial Intelligence: Fall 2022, Fall 2023, Spring 2024, Fall 2024.
  - Artificial Intelligence and Machine Learning: Fall 2022, Fall 2023, Fall 2024.
- **Tencent AI Lab** — *Jan. 2022 - May 2022*
  Intern of the Computational Optimization Group — Shenzhen, China
  - Test the TensorRT Plugin Autogen Tool for automatically generating high-performance TensorRT plugins.
  - Write test cases for 80+ TensorFlow operators to measure the performance gap when using the tool.

Honors and Awards

- Shenzhen University Outstanding Graduate — *2026*
- National Scholarship for Master Students — *2025*
- Shenzhen University First Prize of Academic Scholarship — *2025*
- Shenzhen University First Prize of Academic Scholarship — *2024*
- Shenzhen University Special Prize of Academic Scholarship — *2023*
- Shenzhen University Outstanding Graduate — *2023*
- Shenzhen University Honored Bachelor Degree — *2023*
- Shenzhen University Tencent Innovation Scholarship — *2023*

Additional Information

Languages: Mandarin (Native level), Cantonese (Intermediate level), English (IELTS: 7.0)
Interests: Badminton, photography
